

Become a Local Business Consultant – Is This “Ligit” or a Scam?

RealHomeBusinesses.com/consultUSA.htm offers a work at home business opportunity to become a field business consultant and share in the fees generated by offering high demand services to local small businesses owners at bargain rates. We have field consultants across the country offering these services to their local small business people and collecting nice fees for their work.

Why are our services needed? Because to make a business run successfully you need three ingredients: Technical expertise, sufficient capital and business acumen. If you have a roofing company you better know how to put roofs on and repair them; that is the technical expertise and most owners need no help there. The second area is sufficient capital. Most small businesses start off on a shoe string and without judicious handling of the cash flow, capital or cash may continue to be a problem for them. We can help with business funding. The third are of Business Acumen is where we really shine. Typically our roofer is a hard working guy who can install roofs with the best of them but he is a terrible business man. His books are a mess and from day to day he never knows if he is making money or losing money. We can really help this guy with a Comprehensive Financial Analysis to show where the business is strong and where it is weak and how to strengthen the weak areas.

How does this work? If you can dress professionally, and you aren't afraid to talk with people and you can follow directions; you can be successful in this business as a Field Business Consultant. What does this mean? Simply you dress in a professional manner meaning clean clothes tastefully worn so you look similar to the business people you will be contacting. Then you have to be outgoing enough to strike up a conversation with the business owner and show one of our staple sample documents (Business Appraisal or the Comprehensive Financial Analysis) to see if they might want us to develop one for them.

Then following directions get a questionnaire completed, collect 5 years of financial statements (income statements & balance sheets), a couple pictures, copy of their business lease etc. and a check made payable to the field consultant. Field consultants typically charge \$850 for the Comprehensive Financial Analysis and they send us a check for \$500. They could charge more but we only take the \$500. They send all the items collected and our \$500 check to us and we produce the professional document that we send back to the field consultant for client presentation. If desired, we will be available to explain the findings of our analysis to the client. That in a nutshell is it. Once we get to know the business with our analysis, we can often venture into funding or appraisal or for-sale-by-owner business sales package or profit development etc. You should visit www.My-Biz-Doc.com to see a complete list and explanation of our services offered.

So is this business ligit or a scam? Our list of past clients will testify to the validity and quality of our services. If you can dress as a professional, talk with people and follow directions; you too can be successful in this business. If you're looking to become a business consultant or business analyst or a management consultant or a marketing consultant or a small business consultant this is it.
